Iteratiivinen ohjelmistokehitys

Scrum

```
class Todo:
    def __init__(self, content, done=False, user):
        self.content = content
        self.done = done
        self.user = user
        self.id = str(uuid.uuid4())
```

```
class User:
    def __init__(self, username, password):
        self.username = username
        self.password = password
```
